

2018 CORPORATE WELLNESS EDUCATION DAY

What You Will Take Away From This Program

How simple and inexpensive applications make communications between the office and field easier.

How group captive programs save tons of money for midsize companies.

How to simplify and update compliance with labor laws.

How to expose the hidden costs and risks of project wrap up insurance.

Somebody is trying to hack your network right now – learn how to keep them out.

How to avoid claims and disputes.

And more!

2018

CORPORATE WELLNESS EDUCATION DAY

Special Programming for Subcontractors

Hosted by:

SMITHCURRIE

Friday, June 1, 8:00am to 5:00pm
MGM National Harbor, MD

ASA of Metro Washington, in conjunction with the law firm of Smith Currie, presents a full day of educational programming for a company's business health. With financial, legal and technology tracks, there is something to be learned for many individuals within one company.

Attendees will leave inspired and equipped with the tools and knowledge to mitigate risk for their company in the coming year.

Breakout Sessions II

12:00pm to 1:30pm

Lunch & Networking

1:30pm to 3:30pm

Breakout Sessions III

3:30pm to 5:00pm

Breakout Sessions IV

5:00pm

Adjourn

LEGAL TRACK

Session 1: Predicting what the Trump administration will do regarding infrastructure, tariffs, immigration, and existing regulations. Also, recent legal decisions that impact subcontractors.

Session 2: Compliance strategies for our region's mosaic of Sick Leave laws. Compliance refresher every Human Resources person needs regarding affirmative action, EEO, persons with disabilities (section 503), and veterans (VEVRA). How to be prepared for an OFCCP audit.

Session 3: Claims Prevention: payment collection techniques before resorting to liens and bonds; subs' rights when work is suspended; subs' influence in bid protests; and much more.

Session 4: Dispute Management: the role of consultants and experts, how technology is changing discovery, liquidating agreements, what to do if a GC defaults or if you are a second-tier sub and the first-tier sub defaults, and more.

FINANCIAL TRACK

Session 1: The hidden costs and risks to subs on projects with Owner or Contractor controlled insurance programs, and how to protect your business. Understanding the exclusions, limitations and deductibles. Case studies that will surprise you.

Session 2: Maximize the costs you are entitled to when calculating your labor burden for change orders and claims. Turn your indirect costs into direct costs. Avoid committing fraud.

Session 3: The best insurance decision you will ever make is joining a group captive. Midsize companies can reduce health insurance and workers compensation costs by 35%. If you are responsible for the insurance in your company you must attend this presentation.

Session 4: Design-build and P3 best practices from a subcontractor's view point when submitting a bid, reviewing contract clauses, bonding, project financing, legal rights, and the differences between public and private ownership. Case studies will demonstrate dangers to avoid and lessons learned.

TECHNOLOGY TRACK

Session 1: The Internet of Construction Things – smart tools, data logging, remote operation, data transmission, people tagging, big data, and what it means to the future of our industry.

Session 2: Unmanned Aerial Vehicles in Construction - types and capabilities, where they are allowed to fly, how and why they are watching you work, and who owns the pictures and videos. Future technologies and applications.

Session 3: Cyber Security - we are all vulnerable unless we incorporate robust defenses. Best practices to repel hackers from your network. Case studies of crippling attacks.

Session 4: Project management systems that foster internal communications between your office and your field employees. Save time, reduce misunderstandings and reduce waste.
